

To Do:

Winter 2021 transfers and final check;
Norbert: Netherlands/Germany/France???
Andrea: Italy/Portugal/Spain???
Kev: England/Scotland/Turkey???

EPL transfer values very high compare to other transfer values. do we need those values, because they have no use at the moment I believe???

Caps for players are not up-to-date. We need to check the caps. (remember that more than 128 caps will reset the count to 0...) <Was there not a special way of notation for that?>

HD1/HD2 are up-to-date

GD1/GD2 are up-to-date

FD1/FD2 are up-to-date

Keep checking for double players!

Comment Lee Montgomery: is it possible for Manager Holidays to be tweaked so that no team activity happens when you are on "holiday"?

Remove 30 year limit. TESTING

Use start year 2020 or 2021. TESTING

Changes player values to real life values. David&Andrea???

Update EPL teams-database with the correct standings for last season. Andrea???
IT GIVES PROBLEMS - I'VE ONLY SET 1 TO LIVERPOOL

Comment Tor: Goalkeeper stats

Change Region to improve transfers. Info from Guestbook command:
I'd just like to say that, having tested it out, I've found that the transfer market is more realistic if England's region is changed from 'Great Britain' to 'Europe'. The same perhaps applies to the rest of 'Great Britain' too. Something which worked even better: I changed 'Europe' to create a 'Market A' and added Russia, China and USA (in addition to England). This influences the flow of overseas transfers, reflecting the current global market.

> I made a copy of the current teamdata. I changed all nations to Nation/Region Africa/Asia/Concacaf/Europe/Oceania/South America. Three nations are not official Fifa members. and I have added South Sudan. TESTING

Positions in England vs the other leagues.
Many AM/FRLC, D/FRL, AMRL. In the other leagues it is FRL. Maybe it is because of the exports from FM. Which positions do we keep?
Harry Kane as AMC feels a bit odd.

Comment from guestbook:

I now suggest the following players also need to have a '2' in attacking. If you don't add these as attackers there may be too few attackers to choose from.:

Villa (Ollie Watkins),
Burnley (Rodriguez, Vydra),
Palace (Wickham, Townsend),
Fulham (Cordova-Reid),
Leeds (Bamford, Roberts),
Leicester (Iheanacho),
Liverpool (Jota, Minamino, Firmino),
Man City (Agüero, Ferran Torres),
Newcastle (Joelinton),
Sheff Utd (McBurnie, McGoldrick),

Tottenham (Harry Kane),
West Brom (Callum Robinson, Hal Robson-Kanu),
West Ham (Michail Antonio).

In addition Fabinho, Liverpool, should also be a D/MC and please add Fosu-Mensah (22 y.o.) to Man Utd as DC/DR (ability: 130, potential: 150?, see last year's version for stats).

Tip from Sveina Aronsen; Year in game by Managers to high. Many managers will retire. Years in Game are changed as following:

Real years	CM9798 years
30 plus	15
29-25	14
24-20	13
19-15	12
14-11	11
10	10

Tip from Sveina Aronsen: Board confidence is 0 so many are sacked. Minimal Board confidence value set to 50.

Turkish Division 2 8 teams needs to be checked. (Bursaspor, Adanaspor, Keciorengucu Menemen, Akhisarspor, Ankaraspor, Eskisehirspor, Balikesirspor)
